Education

Tecnico informática
INSTITUTO DE
TELECOMUNIAÇÕES-ITEL
2020 - 2025

Skills

Languagens & Frameworks

- Laravel (Full Stack)
- Next.js
- React Native
- Node.js
- TypeScript
- Flutter & Dart

APIs & Integration

- REST API

DevOps

- Docker
- Git

Language

- English
- Português

About me

Full Stack Developer focused on management systems development and mobile application development. I have experience in data modeling and technologies such as React Native, Flutter, Dart, React.js, Next.js, Node.js, TypeScript, and SQL, working across both backend and frontend. I aim to create scalable and efficient solutions, with a focus on performance and user experience. I am currently expanding my knowledge in Python for new applications and integrations.

Experience

Junior Development Intern at CDCI | 3 years

During this period, I worked on the development of several technological projects, collaborating with multidisciplinary teams as well as on individual initiatives. I took part in the creation and improvement of internal systems, applying good practices in programming, testing, and version control. This experience solidified my foundation in Laravel, MySQL, and agile project management.

Serviço Certo — 1 year

Front-End Developer

Responsible for developing and maintaining modern, responsive interfaces using React.js, Next.js, and TypeScript. I worked on REST API integration, performance optimization, and user experience improvements. I collaborated with the design and backend teams to ensure cohesive, functional products.
